

Spacing: (Spacing classes are extensive, more than 100, so I will just demonstrate how they are named and you will understand)

`.margin-left-16px`
`.margin-24px`
`.padding-right-16px`
`.padding-64px`

(You should understand now, very simple, just specify the class using the direction and amount of pixels. For spacing in all directions, omit the direction name, and use `.class-*px*`)
